1. Introduction

Infox is pleased to present this document for the implementation of InfoX Human Resources Information Systems.

Infox is a global IT solutions and services provider, specializing in the IT needs of small to medium scale enterprises. We have experience in a wide range of industries, as well as market segments including Finance, Accounting, Commerce and Mobile. With our partner network and strong in-house engineering team, we work closely with our clients to understand and provide tailored solutions for their enterprise IT problems. We consider our strong partner network, expertise, service dedication and turnaround time as our competitive edge, especially in serving the demands of SME organizations.

Our core focus areas are IT consulting, systems integration, project management, software development, quality assurance & testing, remote application management and support services. Our offshore technology delivery centre is based in Colombo, Sri Lanka. As a company we value quality, accountability, integrity, mutual respect, continuous improvement, passion for technology and focus on solutions across employees, partners and clients.

Infox appreciates the opportunity to implement InfoX Human Resources Information Systems for Original Apparel.

Chandrani Wijekoon	- HR Staff (Hanguranketha) (L - 0815110000)
Kumudika Divyanjalee	- HR Staff (Weerawila) (L - 0475475400)

1.3 Terms and Conditions

The facts contained in this BRD either about the solution or otherwise supersede those contained in the document.

Finalized BRD will have to be read and confirmed within 5 working days from the day of submission of the BRD. Any addition/change to the agreed BRD should come through the Change Request process to amend the scope of work.

OA will need to ensure that the relevant users will be involved in the relevant stages of the requirement collection, system development and implementation process in order to make sure that they get the necessary exposure to the product and its functionalities.

1.4 Purpose

This document is used to capture the business requirements for the implementation of Human Resources Information Systems at Original Apparel (Pvt) Ltd. It documents the problem statement, identifies all the stakeholders, describes their profiles and specific needs, the business needs, and the current and proposed process flows. The intended audience of this document is the management, staff and users of Human Resources Information Systems at Original Apparel (Pvt) Ltd and any relevant parties.

1.5 Overview

InfoX HRIS system is a powerful solution which facilitates tracking, reporting and managing attendance and payroll of staff around the clock. The system allows you to capture data from any time recording device, monitor employee's attendance, plan shifts & rosters linking with HRIS, Payroll and Leave for accurate rewards management. Automated procedures ensure that mistakes are avoided, and the maximum time is saved.

The system will reduce the cost of administration and ensure that accurate data is captured and transferred to the HRIS and Payroll applications.

Areas such as overtime, late attendance, no pay, work hours and midnight crossover are also catered for by the system. The user is provided with the facility of selecting which areas are to be included in the process.

This project covers the implementation of the below stated modules for

Original Apparel (Pvt) Ltd

- Employee Management
- Payroll Management
- Time and Attendance
- Employee Self-Service Portal (ESSP)
- Loan Management

2. Project Context

2.1 Client Overview

The venture started with a factory established in 1996, which was re-branded in 2015 under the name-style Original Apparel with a new Directorate now at the helm of this enterprise. Joint venture between local directorate & Original Marines, a childrenswear retailer based in Italy has brought together the combined strength in financial & management expertise required to propel the growth in capacity & turnover.

Original Apparel comprises of three (3) Production Units with a 1,500 strong work-force that produces over six (6) million pieces per year. Plans are now afoot to expand capacity rapidly to more than 12 million pieces in next two years.

2.2 Problem Statement

The prevailing system for payroll management, attendance and leave management does not cater to complex reporting requirements of the HR department and the management of Original Apparel (Pvt) Ltd. Multiple parts of this operation are handled manually and consumes considerable amount of time and effort for processing information. Due to the present manual process followed by the HR team, the focus on strategic HR initiatives are held back. This has led to duplication of work and inefficiency in overall HR operations.

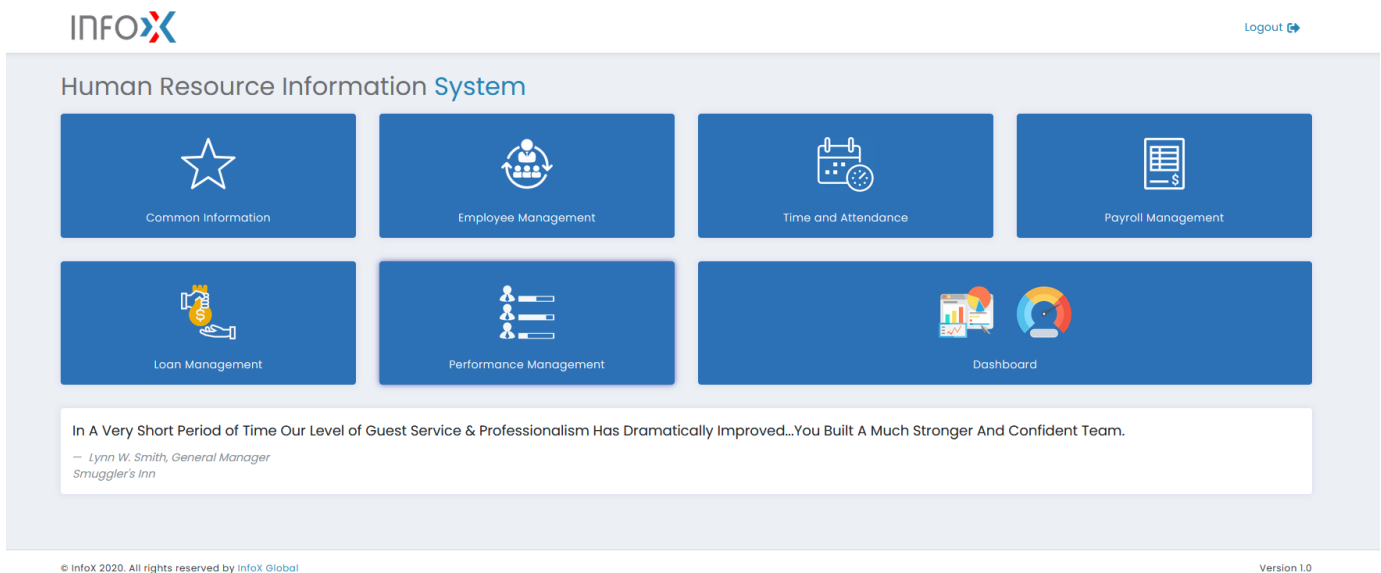

In order to bridge this gap and with the focus of implementing a unified system to manage Payroll, Time & Attendance and Leave process in future. Original Apparel (Pvt) Ltd. is keen to invest on a new HRIS application, starting with the automation of its payroll management, loan, attendance and leave management process as an initial step.

2.3 Project Objectives

- Implement InfoX HRIS, which will facilitate the HR process requirements of OA.
- Consolidated HRIS information availability at the head office.
- Provides an open, flexible, reliable technology base for future expansion.
- Enhances the ability and effectiveness of staff to perform their jobs.
- Provides information for decision making and other business processes on a real time basis while maintaining high levels of data security.

3. Proposed Modules

3.1 InfoX Modules

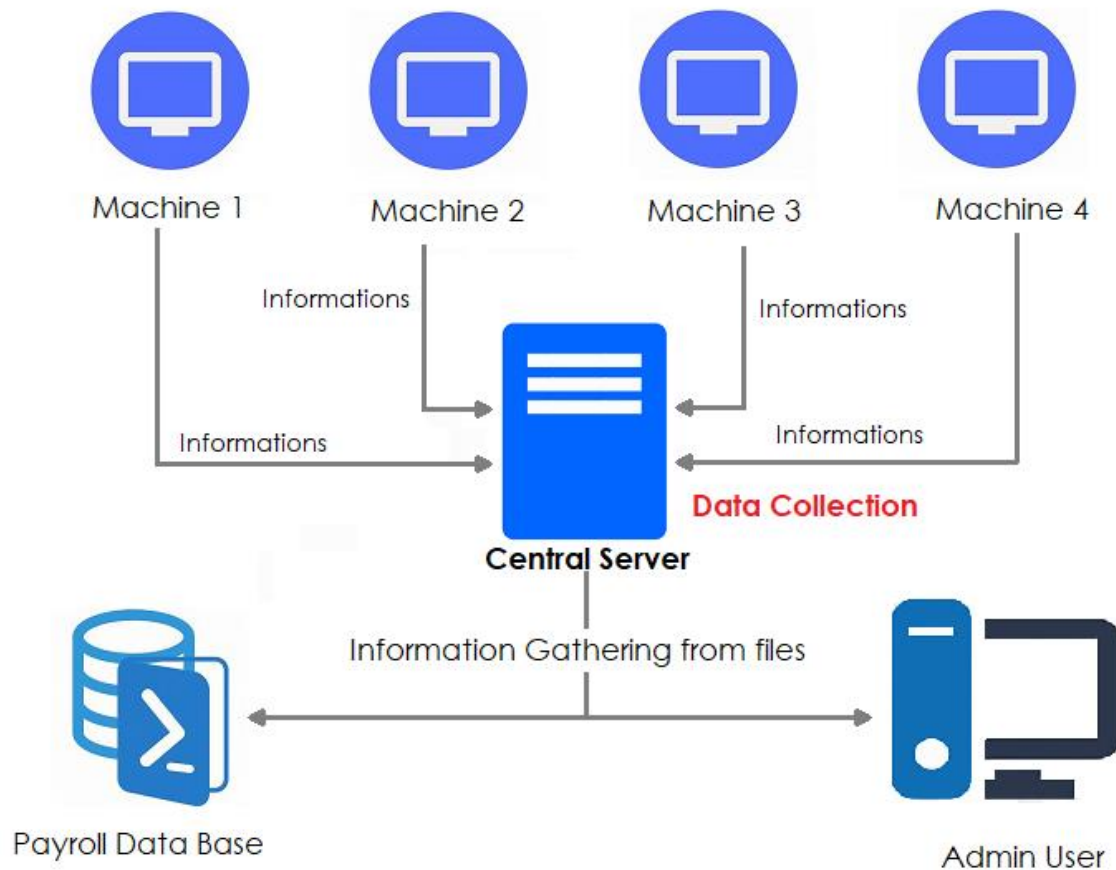

Following are the modules to be implemented at Original Apparel.

- Employee Management
 - Payroll Management
 - Time and Attendance
 - Employee Self-Service Portal (ESSP)
 - Loan Management
-
- InfoX HRIS is a quick to implement, simple-to-use HRIS solution with the power to support your business ambitions.
 - Improves productivity through streamlining and connecting the entire business.
 - Can be deployed in the cloud or on-premise servers.
 - Manages multi-location or multi-national growing business with our HRIS Solution.
 - Make intelligent decisions with a wide range of reports and analysis tools while providing detailed information about business performance.
 - Ability to easily configure and customize the system according to current business needs.
 - Effortlessly adapt to changes in demand by adding functionality, customizing applications and online capabilities.
 - Easy configuration and integration with many other 3rd party applications and platforms.
 - Security is considered as one of key priorities and the system is designed with necessary encryptions.

3.2 Solution Overview

An organization can facilitate many Scanner machines to monitor the time and attendance of their employees. The InfoX HRIS T&A module will bring in all machine information (i.e., once the employees in the organization, scans their attendance (finger scan, proximity cards, etc.) in to the time/attendance machines, the system (central server) will automatically access the text files containing the information on employee's attendance cards in to the central server (availability of network connectivity)

4. Proposed Solution

Special Note:

- 1) Employee intercompany transferring applicable for the all companies and employee's service period will continue with the transfer.
- 2) EPF No is unique for each company except Unit 1 & Unit 2 EPF No will continue with same sequence.
- 3) EPF No Will be the main identification field of the employees.

4.1.2 Employee Types Status Classification

Employees can be categorized based on their status.

Types of Employee Status Classification (For all companies).

- Probation
- Confirmed
- Contract Basis
- Trainees

This information can be used to generate certain reports for decision making, as well as in the matter of employee assignment though out the organization.

4.1.3 Employee Job Categorization

Employees can be categorized based on their Job Classification

Types of Job Categorized.

- 1) Original Apparel (Pvt) Ltd - **Unit 1 & Unit 2**
 - Executive Staff
 - Office staff
 - Factory Workers
 - Factory Staff
 - Cleaning Workers
- 2) Original Apparel (Pvt) Ltd - **Hanguranketha**
 - Executive Staff
 - Office staff
 - Factory Workers
 - Factory Staff
 - Cleaning Workers
- 3) Original Apparel (Pvt) Ltd - **Weerawila**
 - Executive Staff
 - Office staff
 - Factory Workers
 - Factory Staff
 - Cleaning Workers

4.1.4 Employee Profile

Employee Basic Information	
EPF Number	Permanent Address
First Name	Temporary Address
Last Name	Postal Code
Initials	Contact No (Mobile)
Full Name	Contact No (Home)
Call Name	Office No (Mobile)
Gender (Male/ Female)	Email
Status (Single/ Married)	NIC
Date of Birth (dd/MM/yyyy)	Passport No
Recruitment Date (dd/MM/yyyy)	Expiry Date (Passport No)
EPF Entitle Date (dd/MM/yyyy)	Emergency Contact Person
Confirmation Date (dd/MM/yyyy)	Emergency Contact Address
Retirement Date (dd/MM/yyyy)	Emergency Contact No
Department	Relationship
Designation	Remarks
Job Category	
Employment Type	
Cost Centre	
Direct/ Indirect	

Employee's Additional Information will be as following.

- Blood Group
- Religion
- Ethnicity
- Distance from Permanent Address
- Transport Route
- Province
- District
- Electorate District
- Divisional Secretariat
- GS Division

4.1.5 Time and Attendance Details

Please describe as how each shift type is applicable among the company. All the times are shown as 24 hours clock.

4.1.5.1 Company Day Types

Please describe as how each day type is applicable among the company.

Day types of Companies.

- Working day
- Saturday
- Sunday
- Mercantile Holiday
- Poya Day
- Company Holiday

27. Employee Yearly Pay Summary Report

4.5 System Administration

- User Creation
 - HRIS system should be centralized. All users should be linked to a centralized system
 - System administrator should have the rights to create users and user roles. User will be given an ID which is password protected.
 - User rights will be assigned to user roles. Users must be mapped to user roles. Mapping or un-mapping can only be done by the system administrator.
 - One user can be mapped to one role (one to one relationship) but multiple users can be assigned to one role.
 - System should be able to map dashboards to the user roles.
 - User role changes report is required.
 - Following details will be maintained in relation to a user.
 - Users' Name
 - User ID
 - User Password
 - Email address
 - Mobile Number
 - User type (Global or Normal)
 - System should be able to create global users. Global user will have rights to access for all branches. However, rights to the features for each branch should be given in the user role mapped to the global user. All rights will be given to a global user by default.
- Multi-currency feature will not be available in the system. Single currency will be maintained in the system which is LKR.
- Future or back-dated transactions are not allowed in the system.
- Date format should be DD/MM/YYYY.

5. Scope of Work

5.1 Organizational Scope

- Number of legal entities (Companies) : 4
- Companies Name : Original Apparel (Pvt) Ltd – **Unit 1.**
: Original Apparel (Pvt) Ltd – **Unit 2.**
: Original Apparel (Pvt) Ltd – **Hanguranketha.**
: Original Apparel (Pvt) Ltd – **Weerawila.**

5.2 Functional Scope

Following modules/features will be developed and implemented for Original Apparel (Pvt) Ltd:

- Employee Management
- Payroll Management
- Time and Attendance
- Employee Self-Service Portal (ESSP)
- Loan Management

5.3 Out of Scope Processes

- Performance, Recruitment and Other HRIS modules apart from the above-mentioned modules in section 5.2 will not be considered under this scope of work
- No integration to any 3rd party software is considered under this scope of work.

5.4 On Site/Offsite Enablement

Enablement will be carried out by Infox resource(s) who will deploy the project at the client's head office. Both onsite and offsite deployment will take place at different stages of the project.

5.5 Project Plan

5.5.1 HRIS

Location of Enablement : Infox Colombo
 Estimated Project Duration : 14 Weeks

5.5.2 HRIS Implementation - High Level Project Plan

Resource Type	Quantity
Business Analyst / Functional Consultant	1
Project Manager	1
Software Engineer	1

Phases	W01	W02	W03	W04	W05	W06	W07	W08	W09	W10	W11	W12	W13	W14
Requirement gathering and documentation														
Configuration & Developments														
Master Setup														
UAT														
Report Verification and Signoff														
Project Management														

Notes:

- The implementation charges are based on a standard setup communicated by the client. Any additional company implementation will be chargeable on actual effort.
- Any change requests apart from the core features agreed under this scope will be charged additionally based on the number of man days required.
- Any changes / support / training required after deployment and confirmation of the system will be considered as a new requirement. This will be chargeable at the rate of LKR 15,000 per man day (per 8-hour day).

6. Non-Functional Requirements

6.1 Availability Requirements

- Server environment and respective system software should be maintained by OA team.
- User availability in testing and confirming the system is the sole responsibility of OA.

6.2 Security Requirements

User authentication and system security

- **Password requirements**
 - Length; 6 alpha-numerical digits
 - Special characters are allowed
 - Expiry: not required

6.3 Network communication and service security

Data encryptions will not be used during communications. The database management system should ensure that the environments are secured from unauthorized outside access. Maintaining DBMS is the sole responsibility of OA.

6.4 Safety Requirements

Maintaining server infrastructure, communication links and database backup is the direct responsibility of OA. Verifying database backup (by restoring) and backup devices shall perform by OA periodically. In case of a database corruption (including replica), latest available backup needs to be restored into the system. Missing details from last backup to corruption need to be re-entered, prior to start live operation.

6.5 Usability Requirements

6.5.1 Technology Information

Infox HRIS system developed using below technologies.

- | | |
|-------------------|----------------------|
| ▪ Developing Tool | : Visual Studio 2012 |
| ▪ Language | : C# /ASP.NET |
| ▪ Framework | : .NET Framework |
| ▪ Report | : DevExpress |

6.5.2 Web Browsers Information

Following web browsers and versions shall support the proposed HRIS system.

Web Browser	Version
Google Chrome	Latest (recommended)
Firefox	Latest (recommended)
Internet Explorer	Latest (recommended)

6.6 Operating Environment Requirements

6.6.1 Hardware Information

6.6.1.1 Server Requirement

The following Hardware configuration for the system is required for a normal performance level.

Notes:

- It is strictly advisable not to install any additional process intensive software. Please note that it is highly recommended to install licensed copies of above Software.
- Server upgrades would be required in future based on volume of transactions, database size and concurrent users.

Component	Minimum Specifications
Operating System	Windows server 2012R2 or later
Processor	4 core processors
Memory	16 GB upgradable up to 32GB
CD-ROM Drive	Yes
Antivirus software	Yes
Antivirus Definitions	Yes
Free Disk Space	40 GB
Back up Device	Yes

6.6.1.2 Other Requirement

- Facial recognition/ Finger Print Device.
- Backup devices.
- Hubs, Servers and the Workstations should be supported with UPS power
- Patches and Service Packs for other Software:
[Customer should make arrangement to obtain Patches and Service Packs for all relevant non-INFOX products through respective software principles or suppliers.]

6.6.2 Network Information

- The recommended internet connection speed is a 4Mbps or higher.
- here should be a static IP for internet connectivity.

7. Assumptions and Constraints

- During the implementation period users would have to be dedicated for the implementation process apart from their day to day operations, therefore the staff capacity could be a constraint.
- The system will include the use of Mouse, key board and basic windows functions. If the staffs are proven to be incompetent with such system this will slow down the progress of the Implementation. It is assumed that the users of the system are competent enough to handle the mouse, keyboard and basic functions of a PC.
- It is assumed that the users are well aware about the solution and testing will be progressed during UAT.

8. Enablement

Enablement will be carried out by InfoX resource(s) who will deploy the project at Original Apparel (Pvt) Ltd. Both onsite and offsite deployment will take place at different stages of the project. Deployment is considered only at HO.

9. General Information

Infox will assist and supervise the transaction processing of the client for the data entry operations during the implementation by providing the necessary on the job training to the system users.

Necessary operational activities and useful technical hints will be given during the course of the implementation period.

Implementation Plan would be forwarded to the client before the commencement of the implementation of the system. It is highly recommended to follow this plan and all parties should make all effort to adhere to this plan, in order to omit any delays in the project.

The client will be expected to sign the Project Completion Form when the above activities are completed, as it will be the completion of the implementation cycle.

9.1 Client's responsibilities

- Any changes required to the document would be carried out only if communicated within 5 working days from the submission of the document.
- Please note that any modifications or changes requested after this period would be charged based on the estimated time required to carry out the requested changes.
- Kindly note that only up to a maximum of two revisions would be entertained under the current scope of the project, and any further revisions to the Business Requirement Document would be charged based on the estimated time required to carry out the requested changes.
- Once the Business Requirement Document has been approved, any amendments (including changes to the process or additional requirements) needs to be communicated in writing and agreed upon with INFOX as soon as possible.
- Infox will expect adequate commitment from the client's management and staff in order to complete the project on time.
- Client's management should assist and provide necessary hardware on time to work in advance.
- The client should perform data entry; however, INFOX will give necessary instructions on how to enter data.
- Proper backup method should be maintained to avoid data corruption on a day-to-day basis.

9.2 Acceptance Criteria

With the successful completion implementation, InfoX responsibility will cease to exist under the scope of implementation. During this period all activities listed in the project plan would be carried out by the project team provided that the required predecessors are completed by the users.

The subsequent activities and post implementation support will be covered under support service agreement. Warranty period of 6 months will be applicable for bug fixing.

Special Note:

UAT (User Acceptance Testing) will be carried out through the UATC (User Acceptance Test Cases) document which will be prepared by INFOX. UATC document required to be signed before the training period start. Once all the scenarios in the UATC doc is completed, it will be considered as the project completion where customer is required to provide their sign-off.

10. Acceptance of Business Requirement Document

We agree that all the requirements identified by InfoX, presented in this document are actual business requirements of Original Apparel (Pvt) Ltd as of this date. We also understand that the system will be developed based only on this document.

For Original Apparel (Pvt) Ltd	For Infox Global (Pvt) Ltd
