

Annual Leave Policy for Magnetar

Special Note.

- The following policy will apply only for annual leave, and other leave types will not be included in the following calculations.

The following equation will be used to display the leave grid.

- **Annual Leave balance:** Each employee has a different balance. (will be added manually)

Special Note.

- Annual Leave balance doesn't include carry forward leave balance, only the Annual leave balance for this year.
- When an employee applies for leave through the Employee Self-Service Portal, the request goes directly to the assigned leave approval workflow. The leave amounts in the workflow will be deducted from the Annual leave balance at the time of applying for annual leave. If the applied annual leave is rejected, it will be added back to the Annual leave balance.

- **Annual Leave Balance per Month:** Annual Leave balance/12
- **Annual Leave Balance per Day:** Annual Leave Balance per month/30

Special Note.

- It will assume every month has 30 days, regardless of the actual month.

- **Carry forward:** The annual balance for the previous year.

Special Note.

- HR person can add carry forward Annual leave amount manually 
- When applying for Annual Leave, carry-forwarded leave will be used first, and there is no expiration date for carry-forwarded leave.
- When an employee applies for carry forward annual leave through the Employee Self-Service Portal, the request goes directly to the assigned leave approval workflow. The leave amounts in the workflow will be deducted from the Annual leave balance at the time of applying for annual leave. If the applied annual leave is rejected, it will be added back to the carry forward Annual leave balance. 

- **Consumed days:** Number of annual leave days used during the current year. (This will not include the booked balance).

Special Note.

- **Consumed days = {(Annual leave balance at the beginning of the year + carry forward leave at the beginning of the year) – (annual leave balance for today + carry forward leave balance for today)} – total booked balance.**
- **The consumed annual leave balance will not include the Annual leave booked balance.**

- **Total booked balance:** The total booked balance is all applied to annual leave days in the future and not deducted yet from the employee balance.

Special Note.

- **The total booked balance will show all approved annual leave but not the leave consumed up to the date being checked.**

- **Up to date Balance:** Carry Forward leave+(Annual Leave Balance/(12*30))
×Working Days in Current Year)–Consumed Days
- **Total expected balance up to end of this year:** Total of carried forward balance from the previous year + Annual entitlement in the current year - The used days in the current year

Refer below the example for the above calculations. (Below, we have listed various leave statuses of an employee throughout the year).

- Leave status as of January 1, 2024.

Leave Status Check Date	01 st January 2024
Working Days Passed in the Year	0
