1 INTRODUCTION

InfoX is a renowned enterprise specializing in comprehensive business applications and system solutions. With a team of skilled Business and Solution consultants, we have established strong relationships with over 50 top-tier corporate clients in the past 10 years. Our approach combines in-house solutions development expertise and strategic global technology partnerships to provide unparalleled service.

Our committed professionals, backed by rigorous employee training, deliver innovative technology, technical proficiency, and industry-best practices. This dedication has driven InfoX's substantial growth, leading the IT solutions industry with increased market share and a doubled workforce.

At InfoX, our core belief is that an organization is not defined by physical structures, but by its people. We utilize proven tools, methodologies, and approaches to help clients extract maximum business value from their enterprise systems investment, regardless of where they are in their software journey.

Our implementation methodology is closely aligned with agile software development. This approach is designed to adapt to the intricacies of modern software projects, allowing flexibility in design and responsiveness to evolving requirements. We embrace change requests and adjust to emerging needs during the project's lifecycle. By adopting this incremental, interactive approach, we ensure that our HR solutions meet individual customer requirements effectively.

1.1 ACRONYMS & ABBREVIATIONS

Term	Definition
InfoX	InfoX Global (Pvt.) Ltd.
Client	Nienhuis Asia Private Limited.
HRIS	Human Resource Information System
InfoX HRIS	HRIS Product
Proposed System	HRIS product
OT	Overtime

1.3 TERMS & CONDITIONS

The information provided in this BRD takes precedence over any other details, whether related to the solution or not.

The approved BRD must be reviewed and confirmed within 5 business days of the submission date. Any modifications or additions to the agreed-upon BRD should follow the Change Request process for scope adjustments.

The client is responsible for involving the appropriate users during requirement collection, system development, and implementation stages. This ensures necessary familiarity with the product's features and functionalities.

1.4 PURPOSE

This document serves as a comprehensive record of business requirements for the implementation of the Human Resources Information Systems. It encompasses the problem statement, stakeholder identification, their profiles and specific needs, business requirements, and both existing and proposed process flows. The target audience includes the management, staff, and users of Human Resources Information Systems, as well as relevant parties within the client's organization.

1.5 OVERVIEW

InfoX HRIS system is a robust solution designed to seamlessly track, report, and manage staff attendance and payroll at any time. This system enables data collection from various time recording devices, offering comprehensive employee attendance monitoring. It facilitates shift and roster planning in synchronization with HRIS Payroll, and Leave modules, ensuring precise rewards management. Through automation, the system minimizes errors and optimizes time utilization.

The system will lower administrative costs and guarantee the accurate capture and seamless transfer of data to the HRIS Payroll applications. The system also addresses aspects like overtime, late attendance, no pay, work hours, and midnight crossover. Users can select the specific areas they want to include in the process, enhancing customization and efficiency.

2 PROJECT CONTEXT

2.1 CLIENT OVERVIEW

Established in 1929 by Albert Nienhuis in collaboration with Maria Montessori, Nienhuis Montessori has been a pioneering force in educational materials, aligning with Montessori's vision of independent learning. With a steadfast commitment to quality and innovation, Nienhuis Montessori has earned recognition as a global leader in Montessori materials, officially endorsed by the Association Montessori Internationale (AMI).

In 2007, the Heutink Group acquired Nienhuis Montessori, subsequently rebranding as Heutink and expanding its offerings to include three additional educational brands: Educo, Jegro, and Heutink Arts & Crafts. This diversification positions Heutink as a comprehensive supplier of educational materials catering to children from infancy to age 12, in alignment with national and international educational standards.

Moreover, in 1995, Nienhuis Asia was established in Sri Lanka, further extending Heutink's manufacturing capabilities while ensuring adherence to ISO 9001 and ISO 14001 quality and environmental management standards. With a rich legacy rooted in educational excellence and a global footprint, Heutink remains dedicated to empowering young learners worldwide.

2.2 PROBLEM STATEMENT

The current HRMS system used by the client falls short of meeting the intricate reporting needs of the HR department and the company's management. The entirety or segments of this operational aspect are being managed manually, leading to a significant expenditure of time and effort in processing information. The utilization of outdated or inadequate applications for human resource management has impeded the advancement of strategic HR initiatives. Consequently, there is redundancy in tasks and overall inefficiency in HR operations.

To bridge this gap and with the goal of implementing a comprehensive system for the automation of all HRMS functions, the client is eager to invest in a new HRMS application. The initial phase of this initiative will involve automating the processes related to Time, Attendance, and Leave.

2.3 PROJECT OBJECTIVES

- InfoX HRIS is a quick-to-implement, simple-to-use HR solution from InfoX Global with the power to support your business ambitions.
- Improves productivity through streamlining and connecting the entire business.
- The system can be deployed either in the cloud or on-premise servers.
- Our HR Solution effectively manages multi-location or multi-national growing businesses, catering to their diverse operational needs.
- Make intelligent decisions with a wide range of reports and analysis tools provides detailed information about business performance.
- The system offers the capability to easily configure and customize according to current business requirements. It also seamlessly adapts to changing demands by incorporating new functionality, custom applications, and online capabilities.
- The system provides effortless configuration and seamless integration with numerous third-party applications and platforms.
- We recognize the importance of establishing first-line support and ensuring comprehensive documentation for all users. Additionally, training for key users early in the go-live phase is essential for a successful implementation.
- InfoX Global is committed to assisting the organization in effectively achieving ROI for the project. Our focus will be on attaining the following ROI objectives based on mutually agreed-upon targets:
 - o Streamlining HR processes to decrease costs
 - o Enhancing skills within HR departments
 - o Establishing responsibility and accountability for HR data at the appropriate level
 - o Establishing a central HR Competency Centre
- We acknowledge the paramount importance of security in a human resources management system. Given the sensitivity of the information stored in our solution, we employ data encryption for necessary areas to ensure protection.
- Our pricing and payment plans are flexible and can be tailored to meet the unique requirements and investment capabilities of each individual customer.

3 PROPOSED SOLUTION

3.1 HRIS MODULES

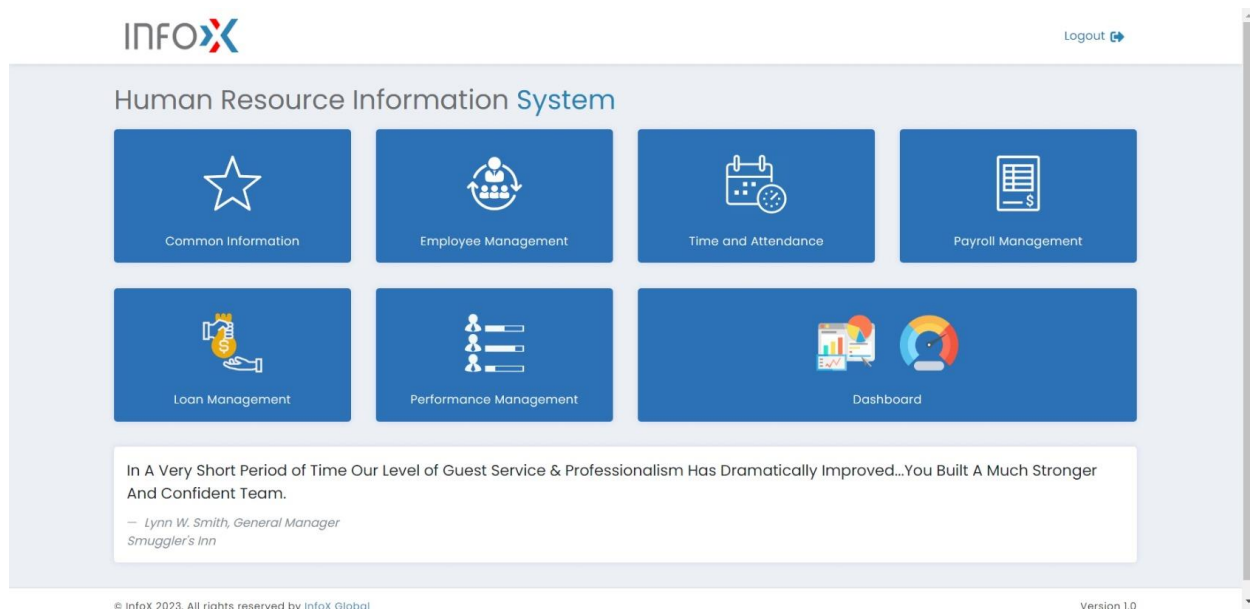

Figure 1: HRIS Home Page

The following are the modules to be implemented at Nienhuis Asia Private Limited.

- Employee Management
- Time Attendance and Leave Management
- Employee Self Service Portal

3.2 SOLUTION OVERVIEW

An organization can employ multiple scanner machines to monitor employee time and attendance. The InfoX HRIS Time & Attendance module seamlessly aggregates data from these machines. As employees use various methods such as finger scans or proximity cards to mark their attendance, this module captures the information and transfers it to the central server. Once employees scan their attendance, the system automatically accesses text files containing attendance data from employee cards. This data is transmitted to the central server when network connectivity is available, ensuring accurate and efficient attendance management.

4 PROJECT REQUIREMENTS

4.1 COMPANY DETAILS

Company Details: -

Company Name	: Nienhuis Asia Private Limited.
Address	: Nienhuis Asia Private Limited, Galpottha Estate, Kiriberiya, Panadura, Sri Lanka.
Contact Details	: (94) 38-2244801/ (94) 38-2244802
Fax	: (94) 38-2244803
Email	: Nienhuis@nienhuis.lk
Web	: https://www.nienhuis.com
EPF Registration No.	: C/15378
Tax Registration No.	: 114147591-7000

Special Note:

- EPF No. is unique for the company.
- The employee code will be the main identification field of the employees

4.2 DEPARTMENT LEVELS & STRUCTURE

4.2.1 Department Levels

A company can be categorized based on company levels.

1. Level 1 - Company
2. Level 2 - Departments
3. Level 3 - Sub-departments

4.2.2 Department Structure

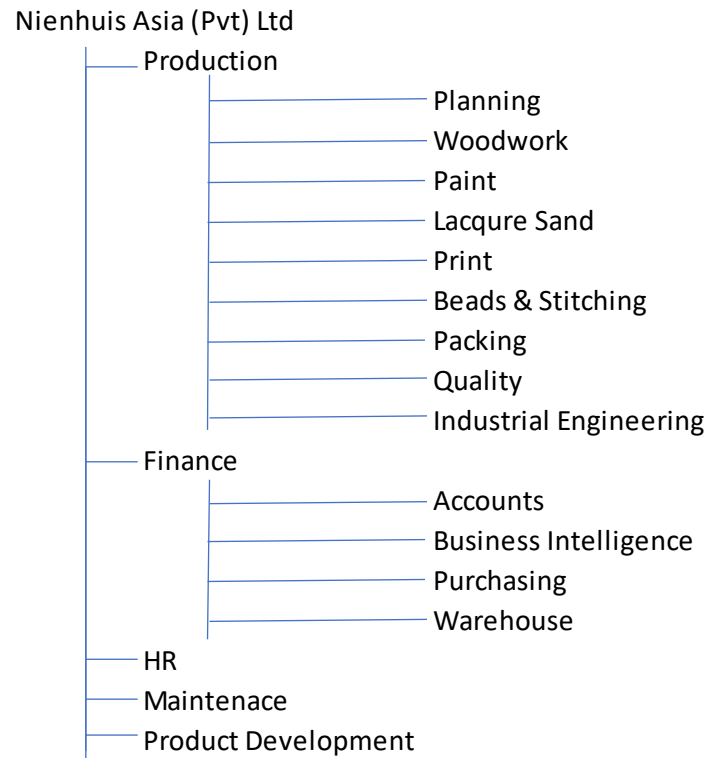

Figure 2: Department Structure at Nienhuis Asia Private Limited.

4.3 EMPLOYEE TYPE STATUS CLASSIFICATION

Employees can be categorized based on their status.

Type of employee status classification: -

1. **Probation** – 06 Month probation (Can be extended up to 09 months). 0.5 Casual leave per month and short leave entitled for probation employees.
 - An email should be sent to HR within the first three months of their probationary period as well as at its conclusion, to remind them of their probationary status.
2. **Permanent**
3. **Contract Basis** – During the first year of the contract period, contract employees are entitled to 0.5 casual leave and short leave. At the commencement of the subsequent year, contract employees are entitled to other leave benefits equivalent to those of permanent employees.
 - An email should be sent to HR at least three months prior to the end date of the contract period.
 - Contract employees should be assigned the same employee number series as permanent employees.
 - EPF entitled.
4. **Trainees** – Only the attendance count is considered. Leave not entitled.
 - Trainee employees should be assigned a distinct employee number series.
 - EPF not entitled.
5. **Out-Sourced** – Out-Sourced employees should be assigned a distinct employee number series.
 - Leave entitled. Leave entitlement will be done through the leave entitlement tab.
 - EPF not entitled.

This information is valuable for generating decision-making reports and efficiently assigning employees across the organization.

4.4 EMPLOYEE GRADE CLASSIFICATION

Employees can be categorized based on their employee grades.

Level of Employee Grade Classification: -

Employment Grade Code	Grade Name
Level A1	Directors
Level A2	Senior Managers
Level B1	Managers
Level B2	Assistant Manager
Level B3	Senior Executive
Level B4	Executive
Level C1	Factory - Production Administrator
Level D1	Factory Worker - QA Leader

Level D2	Factory Worker - Team Leader
Level D3	Factory Worker - Quality Assurance (QA)
Level D4M	Factory Worker - Maintenance Technician
Level D4	Factory Worker - Machine/Process Operator, Warehouse personnel
Level D5	Factory Worker - Helper
Level E1	Factory Worker - Casual/Seasonal/Short Term/Daily wage

4.5 EMPLOYEE JOB CATEGORIZATION

Employees can be categorized based on their activities. In cases where both Wages Board Act and Shop and Office Act employees are part of the same organization, this classification method can be employed during the initial requirement gathering phase. Subsequently, reports can be generated according to this classification, as needed by authorized HR admin users.

- Executive
- Worker

4.6 JOB GRADE LEVEL CLASSIFICATION

Employees can be categorized based on their job grades.

Level of job grade classification: -

Job Grade Code	Grade Name
Grade A	: Grade A
Grade B	: Grade B
Grade C	: Grade C

4.7 DESIGNATION TYPES

Designation Code	Designation Name
FW-H	Factory Worker-Helper
FW-O	Factory Worker-Operator
MT	Maintenance Technician
QAA	Quality Assurance Assistant
TL	Team Leader
STL	Senior Team Leader
PA	Production Administrator
SPA	Senior Production Administrator
JEW	Junior Executive- Warehouse
JEP	Junior Executive- Print
EQA	Executive- Quality Assurance & Process Compliance
EPT	Executive- Process & Technical
EPD	Executive- Product Development
EPL	Executive-Planning
EBI	Executive- Business Intelligence
EFI	Executive- Finance
EHR	Executive- HR
EPU	Executive- Purchasing
EWO	Executive-Woodwork
GDE	Graphic Designer
SEEP	Senior Executive- Planning
SEEC	Senior Executive Coordinator
AMW	Assistant Manager- Warehouse
ACC	Assistant Accountant
AMM	Assistant Manager - Maintenance
MPL	Manager- Planning
MFI	Manager Finance
MPPM	Manager- Process & Product Maintenance
MPR	Manager- Procurement
MBII	Manager - Business Intelligence & ICT
MPA	Manager- Paint
MWO	Manager- Woodwork
SMM	Senior Manager- Maintenance
SMQ	Senior Manager- Quality Assurance & Process Compliance
SCM	Senior Creative Manager
DF	Director- Finance
DP	Director- Production
MD	Managing Director

4.8 DESIGNATION STRUCTURE

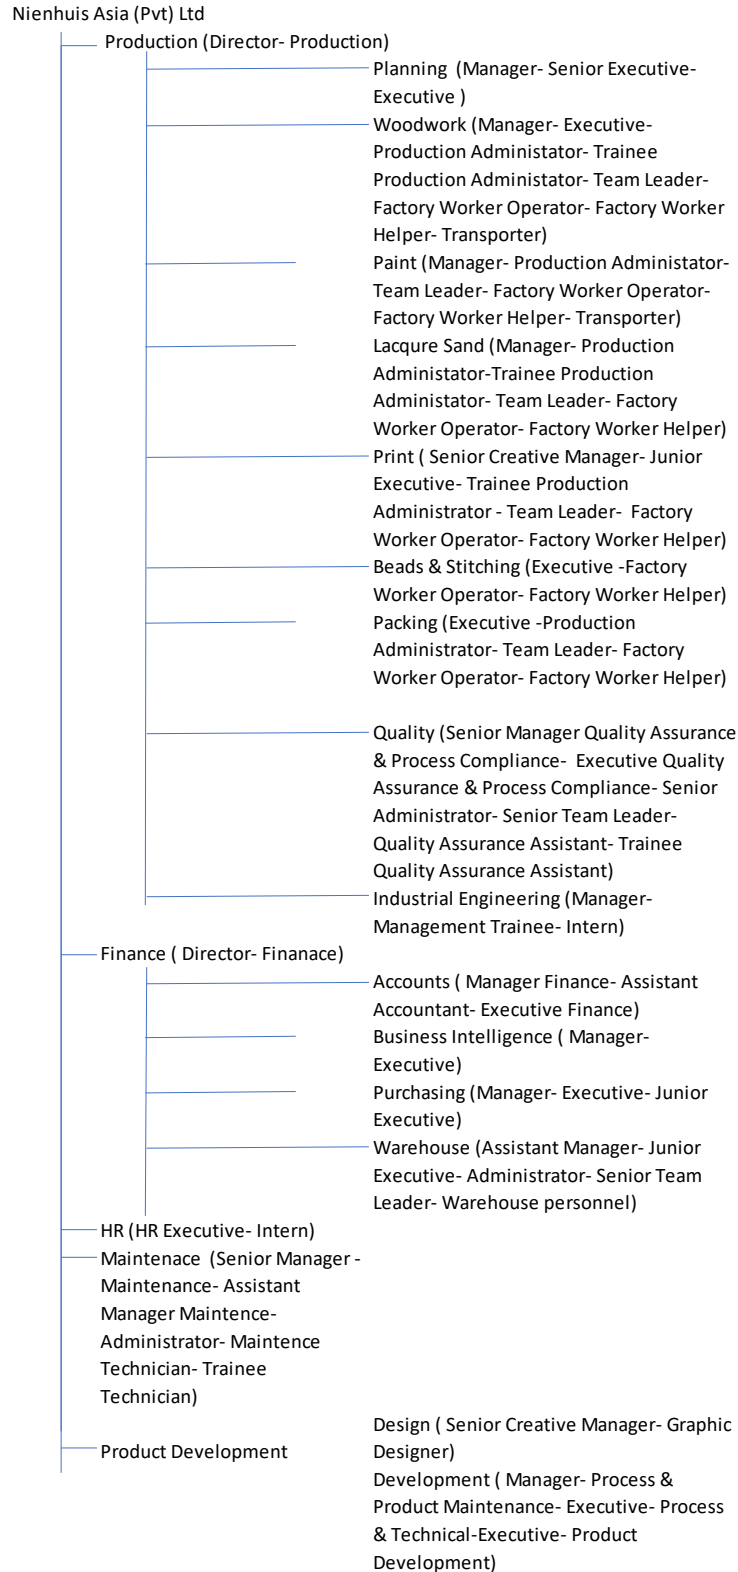

Figure 3: Designation Structure

4.9 EMPLOYEE MASTER INFORMATION

The following fundamental employee information needs to be provided:

Employee Basic Information	Employee Contact Details
Employee Code	Address Line 1
EPF Number	Address Line 2
First Name	City
Last Name	Postal Code
Initials	Contact No. (Mobile)
Full Name	Contact No. (Home)
Call Name	Office No. (Mobile)
Gender (Male/Female)	Contact No. (Whats app)
Status (Single/Married)	Email
Date of Birth (dd/mm/yyyy)	NIC
Recruitment Date (dd/mm/yyyy)	Passport No.
EPF Entitle Date (dd/mm/yyyy)	Expiry Date (Passport No.)
Confirmation Date (dd/mm/yyyy)	Postal Code
Retirement Date (dd/mm/yyyy)	Emergency Contact Person
Department	Emergency Contact No.
Designation	Emergency Contact Home No.
Job Category	Emergency Contact Address Line 1
Job Grade	Emergency Contact Address Line 2
Employment Type	Emergency Contact City
Employment Grade	Relationship
Skilled/Semi-skilled	Remarks
Payroll Act	Staff Loan granted/Recovered
Cost Center	
Direct/Indirect Status	
Occupation Grade	

Additional information regarding employees will include:

- Blood Group
 - Religion
 - Ethnicity
 - Distance from Permanent Address
 - Transport Route
 - Province
 - District
 - Electorate District
 - Divisional Secretariat
 - GS Division
 -
- Below Additional Details should be included,

Children's details

- Full Name
- Birthday
- Age
- School attend /Not
- School name
- Gender

Spouse details

Special Notes: -

- **Retirement date: -**
 - *Employees retirement age should be shown according to the government new regulations (The system must send a notification email 3 months before this date).*
- **For contract employees: -**
 - *A calendar should allow selection of contract start and end dates (A notification email should be sent 03 months before the contract end date).*
- **Recruitment date and EPF entitle date should be similar.**
- **The employee number and the EPF number should be similar.**

4.10 DAY TYPES

Day types include: -

- Working Day
- Saturday
- Sunday
- Mercantile Holiday
- Statutory Holiday
- Poya Day
- Company Holiday

4.11 OT Types

Over Time types include: -

- 1.5 Over Time
 - Working Days
 - Saturday first 5 hours
- 2.0 OT
 - Sunday
 - Saturday after 5 hours
 - Mercantile Holiday
 - Statutory Holiday

4.12 SHIFT MANAGEMENT

4.12.1 Shift Types

The shift types utilized by the client include:

Shift Code	Shift Type	Description	General Shift	Day Shift	Night Shift
01GS	General Shift	8.00 – 18.00	YES		
02WO	Worker Shift	8.00 – 18.00		YES	
03WOSAT	Worker – Saturday	8.00 – 15.30	YES		
04WONT	Worker (Shift-Night)	14.00 – 22.00			YES
05WODY	Worker (Shift-Day)	6.00 – 14.00		YES	
12HRS	12 Hour Shift	6.00 – 18.00		YES	
24HRS	24 Hour Security	7.00 – 19.00		YES	

4.12.2 Shift Groups

The shift groups utilized by the client include:

Shift Group Name	Shifts	Description
General Shift	8.00 – 18.00	Weekdays for Executive staff
Worker Shift	8.00 – 18.00	Weekdays for Worker staff
12 Hour shift	6.00-18.00/8.00-18.00 (01GS)	Weekdays for 12 hour shift
24HRS	7.00-19.00	Shift for security staff

4.13 LEAVE MANAGEMENT

4.13.1 Leave Types

Leave Type	Amount	Comments
Annual Leave	14	Consider as an entitled leave day (all employees)
Casual Leave	07	Consider as an entitled leave day (all employees)
Short Leave	02 Hours per month	Employee can take up to 02 hours per month. Only 01 leave is allowed for a day in a month.
Special Leave	HR update the entitlement	HR will update the entitlement and HR will apply the leave. Employee can not apply leave from the ESSP.
Accident Leave	No constant amount	The quantity of leave is decided by HR at the beginning of the year.
Bereavement leave	HR update the entitlement	The quantity of leave is decided by HR at the beginning of the year.
Day Off	Day off	Described separately
Maternity Leave	According to the act	HR will update and apply the leave.
Lieu Leave	Extra Hours worked per month	Described separately

Day off policy: -

- Day off policy is implemented via ESSP where the Head of the relevant department will allocate 12-hour shifts through the ESSP, with approval from HR.

Lieu Leave policy: -

- Leave entitlement is exclusively granted to executive staff who exceed their designated shift hours. Any surplus hours worked will be recorded, allowing them to request leave in a manner akin to overtime hours worked. This is particularly significant for adjusting late arrivals and early departures within the relevant month.
- The rounded-down amount of extra hours worked will be visible and can be applied through the Employee Self-Service portal. For instance, if an employee worked 2 hours and 51 minutes as extra for a day, it will be displayed as 2.45 hours, rounded down to the nearest 15 minutes.
- Any hours not utilized by the employee will not be carried over to the following month.

Setoff leave for Late arrivals and Early departures: -

- In cases of late or early departures, employees have the option to offset those minutes by applying leave at the end of the month.

4.13.2 Leave Allocation

Information	Description
Leave Allocation	

Annual Leave	14 days
Casual Leave	07 days
New employees (From system enter date until end of year)	All new employees are entitled 0.5-day casual leave for every month (till end of calendar year).
Short Leave Allocation	02 hours per month. 01 hour at a time.
Permanent Employees (When year-end process)	1 st quarter: - 14 days 2 nd quarter: - 10 days 3 rd quarter: - 07 days 4 th quarter: - 04 days
Permanent Employees (When Year-end process)	All the completed employees entitled 14 annual leave & 07 casual leaves.
Leave Apply	
Individual Leave Apply	- Leave will be applied by the HR team based on the approved leave sheet that is handed over manually. - Leave can be applied via the InfoX ESSP.

4.14 REPORT REQUIREMENTS

4.14.1. Attendance Allowance Policy

The primary objective of this section is to generate the attendance allowance report via the system. The company's attendance allowance encompasses the following:

1. The attendance incentive will be calculated weekly
 - General Shift: From Monday to Friday
 - Shift employees: From Monday to Saturday
 - Employees are required to clock in no later than 5 minutes prior to the designated shift start time. Clocking in within 5 minutes up to the shift start time will be allowed on a maximum of two occasions per week.
2. The attendance incentive for a week will be Rs:1,000.00/=
3. You are permitted to take up to 2 pre-approved annual leaves per month. "Pre-approved" means that if an employee applies for leave after their attendance has been recorded, they will be ineligible for attendance allowance for that week.
4. Any other type of leave, including casual leave and short leave, will lead to the loss of your attendance incentive for that particular week.
5. Missing attendance will lead to the loss of attendance incentive for that week.

Example scenario

Example 01

Employee A

	1	2	3	4	5	Entitlement	Comment
01st week	7:45	7:45	7:49	7:56	8:00	1000.00	02 occasions highlighted exceeding 7:55

02nd week	8:00	7:55	7:45	7:58	7:30	Not entitled	03 occasions highlighted exceeding 7:55. Due to that not entitled for allowance
03rd week	Casual Lev	7:45	7:45	7:49	7:30	Not entitled	Casual Leave applied.
04th week	Annual Lev	7:45	7:45	7:49	7:30	1000.00	Only one Annual leave applied

Employee B

	1	2	3	4	5	Entitlement	Comment
01st week	7:45	Annual	7:49	Annual	7:30	1000.00	02 annual allowed for a month
02nd week	Annual	7:45	7:40	7:30	7:30	Not entitled	03 Annual leave for 03rd week
03rd week	7:30	7:46	7:45	8:00	7:30	1000	
04th week	7:46	7:45	8:00	Resigned	Resigned	600	Attendance allowance on pro-rata basis (1000/5*3)

Employee C

	1	2	3	4	5	Entitlement	Comment
01st week	New Recruit	7:49	7:49	7:30	7:30	800.00	Attendance allowance on pro-rata basis (1000/5*4)
02nd week	7:30	7:45	7:40	7:30	7:30	1000	
03rd week	7:30	short	7:45	8:00	7:30	Not entitled	
04th week	7:46	7:45	8:00	7:45	8:00	1000	

Employee D

	1	2	3	4	5	Entitlement	Comment
01st week	7:49	Poya (No shift assign)	7:49	7:30	7:30	1000.00	
02nd week	7:30	7:45	7:40	7:30	7:30	1000	
03rd week	7:30	7:45	7:45	8:00	7:30	1000	
04th week	7:46	7:45	8:00	7:45	8:00	1000	

6. Internal Accidents will be consider only for the week, which it has occurred.

- Example 01: if an employee had an accident on Monday and he /she is unable to attend to the work for few days, still he/she will be entitled to the attendance incentive only for that week. Which is Monday to Friday
- Example 02: if an employee had an accident on Friday still he/she will be entitle to the attendance incentive only for that week.

In the instances described above (when an employee is involved in an accident), HR will apply accident leave through the system.

- The structure of the attendance incentive report is provided as an attachment to the BRD (Attachment 01).

4.15 Employee Self Service Portal

Leave application

- A maximum of two individuals are involved in the leave approval process. Approval from either one person is sufficient for the leave to be approved. Following approval, a notification email is sent to the department head.

Attendance changes request & Attendance approval

- Same as above leave application approval workflow.

Employee timecard

Gate pass application & approval

- The workflow comprises three individuals: the Head of Department (HOD), the Director of the Section acting as the Authorizing Officer, and the Security Section. A preset list of reasons is provided for leaving the office. The security person can add comments and approve.

Notice Board

- The primary tab on the ESSP should be the Notice Board, with two subsections: Policy Documents and Other Notices. When a policy document is uploaded, employees should have the option to accept it. Upon acceptance, a notification will be sent to HR, indicating the employee's acceptance of the policy document.
- All notices are uploaded as PDF documents, and when a notice or policy document is uploaded, employees will receive a notification upon logging into the Employee Self-Service Portal.

Claims

- Salary advance request and the medical application claim.
- Within the salary advance form, employees can submit requests for salary advances, with HR having visibility of the requested amount. HR is empowered to either accept, reject, or adjust the requested amount. Additionally, the HRIS should feature a report displaying employee names, the month of request, the requested amount, and if approved, the approved amount.

Idea Generation Form

- HRIS should include a report function allowing users to view suggestions provided by employees. Employees should have the ability to submit ideas or suggestions in either English or Sinhala languages.

5 SCOPE OF WORK

5.1 ORGANIZATIONAL SCOPE

Number of legal entities (companies): - 01
 Company Name: - Nienhuis Asia Private Limited.

5.2 FUNCTIONAL SCOPE

Following modules/features will be developed and implemented for the client:

- Employee Management
- Time & Attendance
- Employee Self-Service Portal (ESSP)

5.3 OUT OF SCOPE

No integration with any third-party software is considered under this scope of work.

5.4 ONSITE/OFFSITE ENABLEMENT

Enablement will be conducted by InfoX resource(s) who will deploy the project at the client's head office. Both onsite and offsite deployment will take place at different stages of the project.

5.5 PROJECT PLAN

5.5.1 HRIS

Location of Enablement: - InfoX Colombo
 Estimated Project Duration: - 12 Weeks

5.5.2 HRIS Implementation – High Level Project Plan

Resource Type	Quantity
Business Analyst/Functional Consultant	1
Project Manager	1
Software Engineer	1

Figure 4: High Level Project Plan for Nienhuis Asia Private Limited.

Note:

- The implementation charges are based on a standard setup communicated by the client. Any additional company implementation will be chargeable on actual effort.
- Any change requests apart from the core features agreed under this scope will be charged additionally based on the number of man days required.
- Any changes/support/training required after development and confirmation of the system will be considered as a new requirement. This will be chargeable at the rate of LKR 30,000 per man day (per 8-hour day).

6 NON-FUNCTIONAL REQUIREMENTS

6.1 AVAILABILITY REQUIREMENTS

- The client is responsible for maintaining the server environment and the corresponding system software.
- The client bears the sole responsibility for ensuring user availability during the testing and confirmation of the system.

6.2 SECURITY REQUIREMENTS

User authentication and system security.

Password requirements: -

- **Length:** - **6 alpha-numerical digits.**
- **Special characters are allowed.**
- **Expiry:** - **Not required**

6.3 NETWORK COMMUNICATION AND SERVICE SECURITY

Data encryption will not be used during communication. The database management system should ensure that the environments are secured from unauthorized outside access.

6.4 USABILITY REQUIREMENTS

6.4.1 Technology Information

InfoX HRIS system is developed using the below mentions technologies:

- | | |
|--------------------|----------------------|
| - Developing Tool: | - Visual Studio 2019 |
| - Language: | - C#/ASP.NET |
| - Framework: | - .NET Framework |
| - Report: | - DevExpress |

6.4.2 Web Browser Information

The following web browsers and versions shall support the proposed system:

Web Browser	Version
Google Chrome	Latest version (recommended)
Mozilla Firefox	Latest version (recommended)
Microsoft Edge	Latest version (recommended)

7 ASSUMPTIONS AND CONSTRAINTS

- During the implementation period, users would have to be dedicated for the implementation process apart from their day-to-day operations. Therefore, the staff capacity could be a constraint.
- The system will include the use of a Mouse, Keyboard and basic windows functions. If the staff are proven to be incompetent with such a system, this will slow down the progress of the implementation. It is assumed that users of the system are competent enough to manage the Mouse, Keyboard and basic functions of a PC.
- It is assumed that users are well aware about the solution and testing will be progressed during UAT.

8 ENABLEMENT

Enablement will be conducted by InfoX resource(s) who will deploy the project at Nienhuis Asia Private Limited. Both onsite and offsite development will take place at different stages of the project.

9 GENERAL INFORMATION

InfoX will assist and supervise the transaction processing of the client for the data entry operations during the implementation by providing the necessary on the job training to the system users.

Necessary operational activities and useful technical hints will be given during the course of the implementation period.

The implementation plan would be forwarded to the client before the commencement of the implementation of the system. It is highly recommended to follow this plan and all parties should make every effort to adhere to this plan, in order to avoid any delays to the project.

The client will be expected to sign the Project Completion form when the above activities are completed, as it will be the completion of the implementation cycle.

9.1 CLIENT'S RESPONSIBILITY

- Any changes required to the document would be conducted only if communicated within 5 working days from the submission of the document.
- Please note that any modifications or changes requested after this period will be charged based on the estimated time required to conduct the requested changes.
- Kindly note that only up to a maximum of two revisions would be entertained under the current scope of the project, and any further revisions to the Business Requirements Document would be charged based on the estimated time required to conduct the requested changes.
- Once the BRD has been approved, any amendments (including changes to the process or additional requirements) need to be communicated in writing and agreed upon with InfoX as soon as possible.
- InfoX will expect adequate commitment from the client's management and staff in order to complete the project on time.
- The client's management should assist and provide necessary hardware on time to work in advance.
- The client should perform data entry; however, InfoX will give necessary instructions on how to enter data.

9.2 ACCEPTANCE CRITERIA

With the successful completion implementation, InfoX responsibility will cease to exist under the scope of implementation. During this period, all activities listed in the project plan would be conducted by the project team provided that the required predecessors are completed by the users.

The subsequent activities and post implementation support will be covered under the support service agreement. A warranty period of 6 months will be applicable for bug fixing.

Special Note:

UAT will be conducted through the UATC document which will be prepared by InfoX. UATC document required to be signed before the training period starts. Once all the scenarios in the UATC document are completed, it will be considered as the project completion where the client is required to provide their *sign-off*.

10 ACCEPTANCE OF BUSINESS REQUIREMENT DOCUMENT

We agree that all the requirements identified by InfoX presented in this document are actual business requirements of Nienhuis Asia Private Limited. as of this date. We also understand that the system will be developed based only on this document.

For Nienhuis Asia Private Limited.	For InfoX Global (Pvt.) Ltd.
